According to Seemiller & Grace (2015), all of the following statements regarding the average Gen Z student entering college today are true except:

Trouble distinguishing fact from opinion, and a sense of entitlement that anything on the Internet is up for grabs.

An 8 second attention filter and a need for an immediate response.

A propensity to shy away from being rewarded and receiving special acknowledgement.

A tendency to think in a non-linear fashion, and a preference to construct rather than be instructed.

“This must be how black or Muslim people feel in the U.S. It was an unsettling feeling...I worried about the implications – did this mean it would be more difficult for me to find a job in Russia? Or to find friends or girlfriends?”

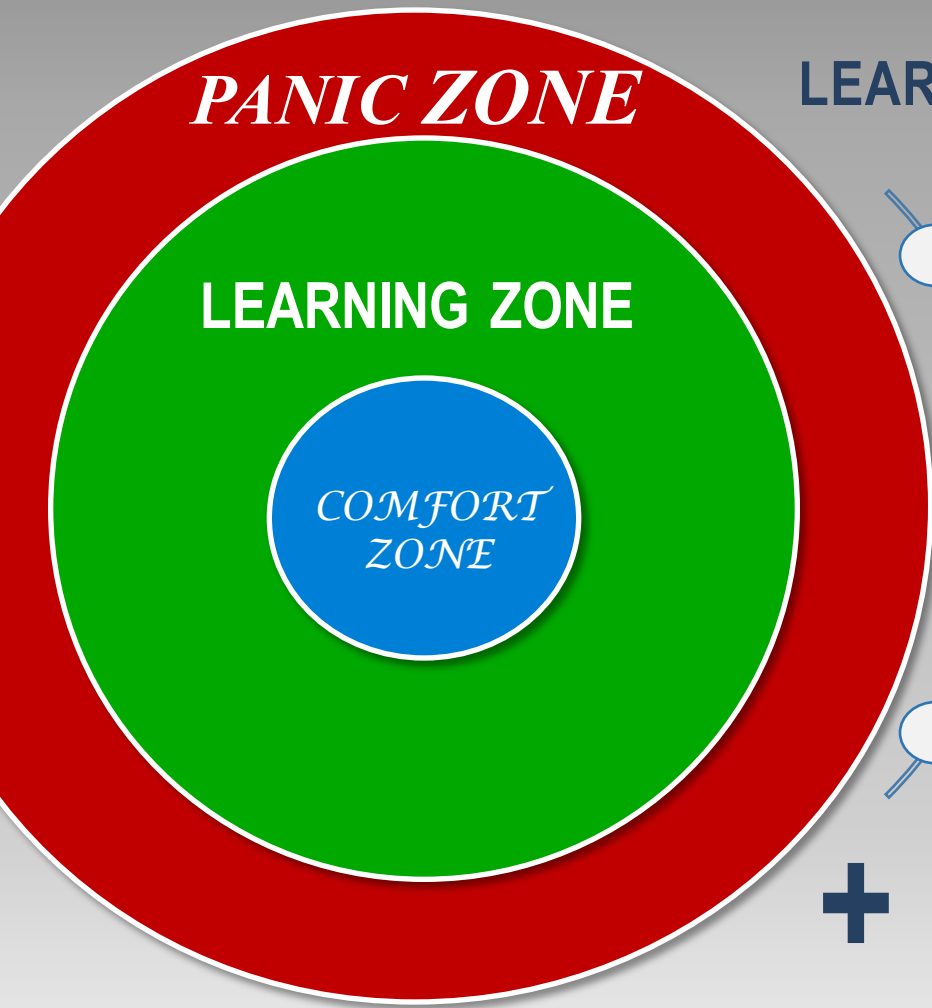

This experience and the consequent reflection helped me realize that the act of racial profiling at a check point might be supporting the continuation of racial discrimination, even if it is beneath the surface.”

“ I realized how much I had in common with this boy. It was at this point where my global mindset completely changed. Instead of the view of all of the poor kids in India as completely different than me –

I realized that we really were quite similar. It made me think a lot about the life I was born into – and the responsibilities I have as a very privileged individual to give back, help, and empower my peers like Ragav.”

Intercultural Agility in 2028

Second group discussion at your table:

How will you utilize or integrate new strategies that enhance intercultural learning on campus and/or abroad in the work that you do?

Think critically and creatively about ‘new strategies’ rather than outright dismissing the change or technology. Consider new approaches, pedagogies, and program models.
